Reset	The reset button has two functions:
	
	• **Reboot** – If your camera is unresponsive or is encountering technical issues, you may need to reboot your camera. To reboot, press and release the Reset button.
	• **Clear All Data** – If rebooting your camera does not resolve the issue or if you need to re-enroll your camera to Pulse, you may need to clear all data. To clear all data and restore the factory default settings:
	  1. Power on the camera
	  2. Press and hold the Reset button for fifteen seconds
	  3. When you release the Reset button, the camera is reset to the factory default settings

Troubleshooting	• Wi-Fi Camera Offline – Please refer to this page if your Wi-Fi is not connected and is listed as "status unknown" in the ADT Pulse app. • Camera Video Quality – Please refer to this page if you are encountering issues with your camera's video quality.

- <u>Pulse Gateway Offline</u> – The video gateway controls your wireless connections. Please refer to this page if your device is offline or is receiving a "Status Unavailable" message.
