Resetting Your ADT System

After an alarm event it may be necessary to clear, or reset, the system display. Use the codes below to reset some of the most common ADT systems. If you do not see your system below, please refer to your system manual.

Unsure which system is yours?

1. While logged into MyADT, click on the blue Overview tab located on the left side of the top menu.
2. On the Overview page, to the right of the Bill & Payment Summary section, you will find "System Information."
3. The name of your system will be shown (e.g., Safewatch Pro 3000).
