Playback and Search

2. Log in using the system User Name and Password.

3. Use the calendar on the right to select the date to play back.

4. Use the drop-down menus to select the channels you would like to playback. Click the display options (_____) to playback multiple channels simultaneously.

5. Click inside the Time Bar to select a playback time. Playback starts immediately at the selected time.

1. Left-click the desired camera for single screen display mode.

2. On the playback toolbar, left-click the Smart Search () icon.

A grid overlay appears on the camera screen.

3. Hold down the left mouse button and drag the cursor over the desired

4. Click Smart Search () to start the smart search query.

Quick Reference Guide

Download a Clip or Video File

1. In live view, right-click to open the Shortcut Menu, and then select Search.

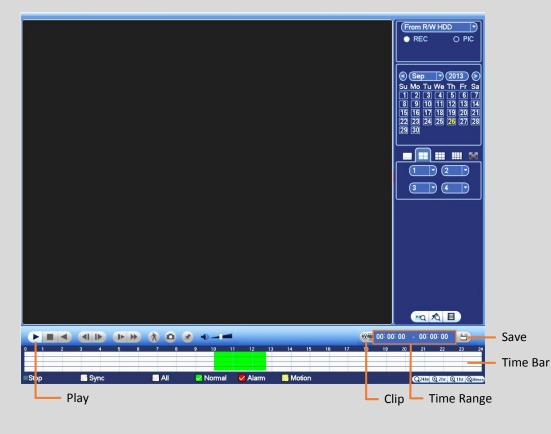

2. If you are not already logged in, the Login screen appears. Log in using the system User Name and Password.

The Search and Playback window opens.

- 3. Click the Play button () and use the mouse cursor to select the desired time on the Time Bar.
- 4. Click the **Clip** button (scissors icon ³) to the left of the **Time Range** window. The Start Time appears in the Time Range window.
- 5. Select the desired End Time for the video clip using the mouse cursor.
- 6. Click the **Clip** button (scissors icon) again to select End Time. Both the Start Time and End Time appear in the Time Range window.
- 7. Click the Save button () located to the right of the Time Range window.

Backup

- 1. In live view, right-click and select Main Menu.
- 2. Select Backup from the Main Menu.
- **3.** If you have multiple devices connected, select the one you want to backup. See number 3 in the figure below.
- 4. Click **Browse** and select the folder where you would like the backup file to be stored. If desired, click the button to create a New Folder, and then click OK.
- 5. Click the **Type** dropdown and select the type of recorded files you want to back up: All, Alarm only, Motion Detect only, etc.
- 6. Select the camera(s) you want to backup from the Record CH dropdown.
- 7. Select the File Format: DAV for standard DVR format or ASF, which is playable on a standard media player.
- 8. Set the file Start Time and End Time.
- 9. Click the Add button.

The system begins a search, and then lists all matching files.

- **10.** Place a \checkmark in the box to the right of the channel you want included in the backup.
- **11.** Click the **Backup** button to begin the backup.
 - The button name changes to Stop.
 - View the remaining time in the progress bar at the bottom.
 - A message appears when the backup has completed.

The orange numbers in this figure refer to the steps above:
